Background of the forum
As growth rate of global economy slows down and demand growth is weakened, expansion of China’s fabrication aluminum industry has slowed down obviously in recent years. China’s aluminum fabrication industry completed a fixed assets investment of RMB155.3bln yuan in 2016, down by 12.6% from 2015, the growth rate slowed down further. Meanwhile, through accelerating industrial restructuring, profit situation of China’s aluminum fabrication industry has been improved obviously, the total profit was RMB 89.6bln yuan, up by 17.3% from 2015.
While the industrial scale was expanded constantly, problems such as decline of operation rate, poor innovation ability, weak profitability, etc, are emerging, which show that China’s aluminum fabrication industry is now undergoing a critical stage of structural adjustment, transformation and upgrading, while, improvement of aluminum application level and cultivation of new growth points of consumption have become necessary guarantees for future sustainable development of China’s aluminum fabrication industry.
As a kind of Green Metal, aluminum has excellent characteristics such as lightweight and easy to recycle, etc. New application fields have emerged constantly in recent years, for example, products like aluminum commercial vehicles, aluminum formwork, aluminum cladding panel, aluminum cable, aluminum- air battery have formed or are forming a certain scale. In the future, aluminum has huge exploration spaces in new materials, new energy, electric vehicles, new-type buildings, package and containers, etc. Exploring new aluminum applications have become hot topics in production and application sectors.
Exhibition of ALUMINIUM CHINA 2017 will be held in Shanghai New International Expo Center during July 17- 19 of 2017, echoing with 2016 China Aluminum Fabrication Forum.
